

## **Transforming Patient Logistics**

### **About VectorCare**

VectorCare is a modern patient logistics platform that helps healthcare organizations coordinate transportation, home health, and durable medical equipment (DME) through a single, streamlined system. The platform reduces delays, eliminates unnecessary phone calls, and improves patient outcomes through automation and real-time communication.

### **Our Mission**

To create a seamless, efficient, patient-centered logistics experience by empowering care teams with tools that simplify operations and improve outcomes.

## **Platform Highlights**

### **Unified Patient Logistics**

- Manage transportation, home health, and DME in one place
- Real-time messaging reduces back-and-forth calls
- Book and manage rides in under three minutes

### **Automated Dispatching Intelligence (A.D.I.)**

- Automates workflows to break down operational silos
- Improves coordination across care teams
- Reduces manual workload and errors

## SMART on FHIR Integration

- Integrates directly with Epic and other major EHRs
- Enables rapid development of custom apps
- Supports modern interoperability standards

## VectorCare Hub

- Build and deploy custom workflows in minutes
- Adapt quickly to changing operational needs
- No engineering resources required

## Impact at a Glance

Metric	Value
Healthcare facilities served	2,500+
Patients moved	3+ per minute
Minutes saved annually	1M+
Reduction in phone calls	Significant decrease across partners

## Who We Serve

- Hospitals & Health Systems
- Care Coordinators
- Home Health Agencies
- DME Providers
- Non-Emergency Medical Transportation (NEMT) Providers

## Why VectorCare

- Faster patient throughput
- Lower operational costs
- Better patient experience
- Real-time visibility into logistics
- Scalable, flexible, cloud-based platform
